Member Ranking Sync 3

 Example Data 3

Overview

The member ranking sync is used to export basic member information for members in a predetermined member ranking set. This is a cumulative file, not an incremental file.

Upon each execution, all current member information is extracted and the completed file is then FTP'd to the predetermined location.

Member Ranking Sync

Name	RankingSet_XXXX_MMDDYYYYHHMMSS.txt (single file) RankingSet_XXXX_MMDDYYYYHHMMSS_####.txt (multiple files) XXXX = Member Ranking Set External Reference #### = File Number
