Member RFM Sync.....	3

## Overview

The Member RFM Sync is used to export RFM information and basic member information for all members in the database.

Upon each execution, all members will be included in the sync file with current RFM information. Files are then FTP'd to the predetermined location.

## Member RFM Sync

<b>Name</b>	Standard_Member_RFM_Sync_XXXXX_MMDDYYYYHHMMSS_##.txt ## = File Number
